Education

- **Pace University, Seidenberg School of CSIS**, New York, NY May 2025
Master of Science in Computer Science — Software Engineering GPA: 3.89/4
- **Institute of Information Technology**, Pune, India May 2022
Bachelor of Engineering in Computer Engineering CGPA: 3.3/4

Professional Experience

- **99 Yards**, New York, NY Sep 2024 — Present
Full Stack Developer Intern
 - Built an internal admin dashboard (React.js, Material UI, Spring Boot, Firebase) that replaced spreadsheet workflows and gave teams real-time visibility into ops.
 - Deployed a Python login-time web scraper to auto-hydrate user data, boosting population speed and cutting manual checks by **40%**.
 - Co-developed the 99 Yards mobile app (React Native + Spring Boot), wiring API integration and backend connectivity for a smooth, crash-free UX.
 - **App Chatbot**: shipped an in-app assistant using OpenAI APIs; tuned prompts and fallbacks so answers are direct, safe, and easy to act on.
 - **Chat Blocker (Trust & Safety)**: implemented content filters that reliably block contact sharing (phone numbers, emails, social links/URLs) to keep conversations on-platform.
- **Cybage Software Pvt. Ltd.**, Pune, India Sep 2022 — Jun 2023
Software Engineer
 - Delivered high-performance Angular + TypeScript features; improved Lighthouse speed/accessibility by **35%** across target devices.
 - Introduced scalable state management (Redux/Context) to stabilize complex views, cutting bug reports by **45%**.
- **Freelance Web Developer (Corporate Sites)**, Remote Aug 2025
WordPress Engineer
 - Designed and launched **two corporate websites** on WordPress for a B2B client: one public-facing marketing site and one product microsite.

Projects

- **Investment Portal — Real-Time Client & Admin** Jul 2025 — Aug 2025
 - Full-stack portal (React.js, Node.js, MongoDB, JWT) with **two roles**: **Client** sees portfolio, deposits, returns, and auto *fund increase* updates; **Admin** manages clients, creates projects, and tracks funding in one place.
 - Real-time numbers and charts (React Query + WebSockets/Server-Sent Events); audit logs for edits; role-based routes; CI/CD to Vercel/Render.
- **CVine — AI-Powered Wine Discovery App** Jan 2025 — May 2025
 - Mobile app that blends hybrid recommendation models with label recognition to personalize suggestions.
 - Google Vision for scans + OpenAI for food pairings; ~95% beta satisfaction; backend scales to 8,000+ wine records.
- **PaceX — Student Social Networking Platform** Jan 2025 — May 2025
 - Real-time chat, stories, and content feeds for **100+** simulated users; backend APIs with Express.js and Firebase Auth.
- **Restaurant Website — Table Reservation SPA** Sep 2024 — Oct 2024
 - Single-page app with live table availability and interactive menu; Firebase for auth and real-time sync; reduced booking friction by **25%**.

Technical Skills & Certifications

- **Languages**: JavaScript (ES6+), TypeScript, Python, Java, SQL, C++, PHP
- **Frontend**: React.js, Angular, Next.js, Redux, Context API, Material UI
- **Backend & CMS**: Node.js, Express.js, Spring Boot, Firebase, RESTful APIs, **WordPress**
- **Databases**: PostgreSQL, MongoDB
- **Tools/DevOps**: Git, Docker, Postman, Swagger/OpenAPI, GitHub Actions (CI/CD), Vercel, Render, Figma
- **Certifications**: HackerRank — Angular (Basic), Frontend (React), Java (Basic), JavaScript (Basic), JavaScript (Intermediate)
